# Dungeon Module MX Monster Codex (MX)

by Tim Krause  
A 5E Reference

The design of this module blends the look of old-school modules of the 1980s with 5E rules. Can't remember where you saw a particular monster or NPC? This guide will help you track them down.

## Preface

As a fairly recent author and designer of 5E modules, one of the things I often start with is basic research. That includes consideration for the monsters and NPCs that will be part of the adventure.

Inspiration can take many forms, and I often find myself relying on books of mythology and other creatures—supplemented by 5E monsters that have similar qualities.

I've also found myself—on rare occasion—searching for a monster and statistics block, unable to find it.

This index is intended to help designers with a couple of challenges. We sometimes see monsters and NPCs in other adventures and want to use them as inspiration in our own adventures—if only we can remember where we saw them.

Or we might be looking for a specific creature that's already been created—but we want to bring them back.

Or we might be looking to create a quick adventure for a pickup game. We might want dinosaurs, vampires or zombies. But they're spread across multiple modules—where are they?

Likely, there are other uses for this reference. It is not intended to replace modules, so you won't find statistic blocks—just references to where to find the information you seek.
